

# .: CenterPoint

## The messaging solution that powers business communication

Productive and practical – that's the key to making collaboration and communication work effectively and efficiently in your business. CenterPoint from Jelecocos delivers by helping your organization optimize your human resources and maximizing your IT investment.

CenterPoint is an outsourced, fully managed solution, delivering the very latest messaging technology and tools combining Microsoft Exchange Server 2007, Microsoft SharePoint®, and BlackBerry® Enterprise Server. Optimizing common applications and technology frameworks makes it easy to implement and use, ensuring and expediting a significant return on investment. As a subscription-based application, CenterPoint allows you to pay only for the number of users you need – eliminating costly cash outlays for hardware and software.

### Jelecocos CenterPoint messaging solution delivers these business benefits:

- Communication, messaging and collaboration
- Security
- Storage,
- File sharing
- Compliance
- Anytime access and availability
