A Hosted Microsoft® Exchange **Messaging Solution** that
Powers Business Communication

JELECOS CENTERPOINT IS IDEAL FOR COMPANIES THAT WANT TO:

- Upgrade from Microsoft Exchange 2003 or other messaging platforms
- Facilitate communication and file sharing, regardless of location
- Implement a retention policy and compliance solution to ease e-discovery
- Cut costs associated with managing in-house messaging systems
- Increase messaging availability and storage capacity
- Stop spam and avoid disruptions from viruses
- Free valuable IT resources to focus on core business initiatives

Your messaging system is the lifeblood of your organization. It governs how your company communicates, collaborates and manages day-to-day activities.

T H E L I F E B L O O D O F Y O U R O R G A N I Z A T I O N

Your messaging system is the lifeblood of your organization. It governs how your company communicates, collaborates and manages day-to-day activities. To be productive, your employees need easy access to e-mail, calendars, attachments, contacts, and more – no matter where they are or what type of device they're using. And to be practical, you need a solution that balances your employees' needs with other business requirements such as security and cost.

That's why Microsoft introduced Exchange Server 2007. And that's why Jelevos, a certified Microsoft partner, developed CenterPoint.

Jelevos CenterPoint is an outsourced fully-managed solution that combines Exchange Server 2007 with BlackBerry® Enterprise Server, SharePoint and several additional products. The result is a seamless messaging system that provides:

- Anywhere, Anytime Access
- Built-in Compliance and Security
- Easy-to-Use Administrative Tools
- Reliability and Performance
- Personal Service and Support

With Jelevos CenterPoint, there's no additional hardware or software to buy. You pay for only the number of users you need. And as technology continues to evolve, Jelevos will work with you to implement updates – so your messaging system will always keep pace with the speed of business. Best of all, CenterPoint is developed and managed by Jelevos, one of the most respected names in the industry.

Let us show you how CenterPoint can deliver the anywhere access your people want, the advanced protection your company demands, and the operational efficiency you need – all for a price that won't strain your bottom line.

INCREASE PRODUCTIVITY WITH ANYWHERE ACCESS

Whether at home, at work or on the road, now employees can review and respond to important messages faster than ever. Jelecoc CenterPoint lets them access to their e-mail, calendars, contacts and shared files from a variety of communication devices – from anywhere, at anytime.

Remote and mobile access allows your business to:

- Save time and improve collaboration by allowing employees to access and share important data, documents and calendars
- Allow users to quickly and easily set up and manage e-mail distribution lists
- Eliminate need for complex VPN connections while ensuring secure communications between Outlook® and your mail server while on the road or working from home

SAFEGUARD YOUR BUSINESS WITH BUILT-IN PROTECTION

You can defend against unwanted spam and viruses, increase system reliability and ensure regulatory compliance with CenterPoint's built-in safeguards.

The increased protection allows you to:

- Keep communication alive and e-mail flowing with enterprise-class availability and reliability
- Help protect users and valuable data from the harmful effects of spam, viruses and phishing attacks
- Ensure data is backed up and make recoveries in minutes, with little or no IT involvement
- Simplify regulatory compliance and reduce the threat of legal action that can result from the misuse of electronic communications

FOCUS ON CORE BUSINESS FUNCTIONS

Your business has a variety of mission-critical systems that require constant attention. Your messaging system shouldn't be one of them. CenterPoint's easy-to-use Control Panel lets you reduce the cost and complexities of maintaining your messaging services and focus your attention on core business activities.

The web-based Control Panel allows you to:

- Save money and free valuable IT and technical resources by eliminating the need to configure and maintain your messaging system
- Quickly and easily create and manage user accounts and add ancillary services such as BlackBerry and SharePoint® access
- Provide large, low-cost mailboxes for the entire organization

IMPROVE RELIABILITY AND PERFORMANCE

Enjoy the peace of mind that comes with knowing your messaging system is always working. CenterPoint provides enhanced reliability and performance through a variety of exclusive managed services.

Jelecoc ensures messaging availability with:

- Multiple distinct data center operations with enterprise-class scalability
- Fully redundant hardware for all critical messaging functions
- Fully redundant connectivity and power sources
- Performance and reliability through the latest 64-bit architecture
- Managed firewalls for increased security
- Jelecoc DataVault backup, restoration and archiving services
- Real-time replication of all stored mail information
- 24 x 7 monitoring
- Automatic patches and updates at no additional cost
- Multiple disaster recovery options

PERSONAL SERVICE AND SUPPORT

We're passionate about our customers and the success of their businesses. The entire Jelecoc team is focused on delivering the personalized services you need and the extensive tools and resources your business deserves. It's the best of both worlds.

With Jelecoc by your side, you'll receive:

- Up-front consultation to fully understand your company's messaging needs and objectives
- A collaborative partnership throughout the implementation process and beyond
- Guidance and support from a team of expert engineers
- An unparalleled service level agreement with availability guarantees
- A long-term commitment to the success of your business – your success ensures ours
