

.: Professional Services

The power of performance

Your business systems are critical to your ability to access information, transact business, share thoughts and ideas, communicate with customers, attract prospects, keep employees productive, secure critical data and make decisions. Jelec's professional services ensure you have the full complement of our technical resources – applied to your specific needs.

We understand that every business is different and the flexibility of our professional services team allows us to approach each engagement accordingly. You're able to utilize our custom applications services, business intelligence and analytics, as well as consulting and lifecycle management expertise in a way that makes sense for your business.

Our proven methodologies ensure the engagement meets critical milestones, while minimizing disruption to your business – in a way that reflects your own style and corporate culture. Whether you prefer the speed of the agile methodology or the process of the waterfall methodology, Jelec is able to accommodate you. The same holds true with our reimbursement, offering you the flexibility of models from project team and fixed bid to process outsourcing, service retainer and time and materials basis.

Because we fit in so well with your own people, you'll find that Jelec is just as comfortable with your in-house technology team as we are determining complete lifecycle strategy in the board room with your business management team.
