

DON'T BE AFRAID. OKAY, BE A LITTLE AFRAID.

Securing your data against today's increasingly aggressive threats is a full-time job in itself: Buying, deploying and managing firewalls, Intrusion Detection & Prevention systems and Anti-Virus/Anti-Spam software ties up valuable IT resources and costs you time and money. And if your business requires PCI or HIPAA compliance, the cost and complexities grow exponentially. Compliance-as-a-Service puts the security experts at JelecOS to work guarding the fort while you get back to the business of doing business.

Fully-managed Payment Card Industry (PCI) compliant environment means we do most of the work in getting you fully certified

Tier III / SSAE-16 / SOC compliant datacenter environments built on best practices and industry standards

Security features such as Intrusion Prevention, and Detection, vulnerability scanning and 2-factor authentication give you the peace of mind you need to do business in today's compliance-driven market

Compliance management can be a full-time job, a costly and complex tangle of rules and regulations best left to the experts. At JelecOS, our standards-based perimeter security and PCI-compliant environment is ready for your most rigorous audits; we'll help you navigate the twists and turns of PCI Compliancy and build a secure computing platform you can trust, with the expert advice and personal service you'd expect from a leader in managed security services. Why build a compliant environment from scratch when JelecOS can provide PCI-ready computing as a monthly service?

LOCK IT DOWN

JelecOS builds everything with security and compliance in mind. The JelecOS Compliance-Ready Environment is built to IT best-practices, and our SSAE-16 certified data center facilities allow for end-to-end compliance solutions to meet any business need.

IN-HOUSE EXPERTISE

Security is our business. JelecOS is one of the only service providers in the region that is third-party certified in both Infrastructure and Application Development methodologies, and our skilled engineers have hands-on experience building systems to rigorous PCI-DSS standards.
